WORK EXPERIENCE

FRONTEND ENGINEER
UNITED STATE OF AFRICA
Austin, Texas, United States

March 2023 - Present

Volunteering to develop a volunteer management system web app.

- I am Working on the front end of web applications using React.js, including creating reusable components, implementing routing and navigation, and integrating with APIs.
- I am Creating new features, functionality, and capabilities on the company website using Javascript, ReactJs, and Tailwind CSS.
- I am Creating modular, responsive templates using modern CSS frameworks like TailwindCSS and JavaScript libraries. Identifying innovative ideas and proof of concepts according to project requirements.
- I worked on a profile section on the VMS platform so that anyone can easily showcase their skills, interests, and volunteer history to potential employers and volunteer organizations.
- I am modifying HTML, ReactJs, and TailwindCSS codes to optimize the performance of the page for faster Loading.

FRONTEND ENGINEER INTERN
ZURI.
NIGERIA

March 2021 - December 2022

A training academy that got me through me several phases where I contributed to the development of several projects. Proud projects was a file comparison app and a hang-out app.

- I led the frontend development team during the project's final phase, providing technical guidance and overseeing the implementation of key features.
- I collaborated closely with UI/UX designers to translate mockups and wireframes into fully functional and visually appealing front-end components.
- Conducted code reviews and implemented best practices to ensure high code quality, maintainability, and scalability of the frontend codebase.
- Actively participated in team meetings, providing insights and suggestions to improve the overall user experience and front-end development process.
